# RANSOMWARE READINESS ASSESSMENT

## How would you score against an emulated attack?

**ACTION PLAN**
Are you confident in your protection, action plan, and recovery from encryption, exfiltration, and extortion?

**EMPLOYEE**
Are you prepared for when employees fall for increasingly savvy social engineering attacks?

**AI & MACHINE LEARNING**
How do you stay on top of rapidly evolving tactics, including bad actors utilizing Artificial Intelligence and Machine Learning, over the course of time?

**AVAILABILITY**
Are you confident you will maintain crucial availability?

**BACKUPS**
Do you have comprehensive backups and segregated back architecture?

**OPTIMAL SECURITY**
Are you utilizing your cybersecurity solutions properly and optimally?

## We can help.

Discover how Nth Generation can safely emulate a real-world ransomware attack and pinpoint what your weakest security controls may be with a **Ransomware Readiness Assessment**.
